EDUCATION

University of Toronto

Toronto, ON | Expected June 2026

Bachelor of Science, Specialization in Computer Science and Data Science

- CGPA: 3.98/4.0
- Relevant Coursework: Machine Learning & AI, Data Science, Databases, Probability & Statistics
- Awards: Beasiswa Indonesia Maju Scholarship (fully-funded, \$400,000), University of Toronto International Scholar Award (\$100,000), Dean's List Scholar (2025, 2024, 2023), Best Presentation DataFest (2024)

TECHNICAL SKILLS

Languages: Python, Java, C/C++, HTML/CSS, JavaScript/TypeScript, SQL, R, MIPS Assembly

Frameworks/Libraries: Pandas, NumPy, scikit-learn, tidyverse, Seaborn, ggplot2, plotly

Databases & Tools: MongoDB, PostgreSQL, Redis, Prisma, Git, AWS (Lambda), Tableau, Jupyter Notebook, Kibana

WORK EXPERIENCE

Data Science Intern – Royal Bank of Canada (RBC)

Toronto, ON | May 2025 – Present

- Developed an NLP pipeline in Python to detect unauthorized IT assets by ranking the top 3 closest matches from 1,000+ records, reducing compliance review time by 80%.
- Built an executive dashboard in Python tracking the top 10 high-risk hardware and software assets, enabling leaders to prioritize remediation and reduce potential downtime risks for 5,000+ employees.
- Created an operational risk metrics dashboard in Kibana to monitor key performance indicators and generate reports for leadership, improving visibility into risk trends across 10+ teams.

Backend Software Engineer Intern – Bang Jamin

Jakarta, Indonesia | June 2024 – Aug. 2024

- Built and optimized REST APIs for a car dealer dashboard, serving 1,000+ users using TypeScript and Node.js.
- Automated insurance policy generation by integrating external APIs and querying MongoDB, improving efficiency by 60%.
- Designed and implemented API tests using Jest and documented APIs using Swagger.

ACADEMIC PROJECTS

Predictive Modelling of Bike Share Usage | R, Machine Learning, API, plotly

- Built and compared five predictive models (Linear Regression, GLM, GAM, Random Forest, XGBoost) on 25,000+ trip records from Toronto Open Data and OpenWeather API
- Tuned hyperparameters via cross-validation, achieving optimal performance with Random Forest ($R^2 = 0.85$, RMSE = 330), and presented findings through an interactive [website](#).

Trending Topic Analysis of Twitter | Python, Pandas, Numpy, NLP, scikit-learn

- Preprocessed 10,000 Canadian political tweets (tokenization, stemming, punctuation removal, stopwords filtering) to uncover key trends and enhance insights into social media discourse.
- Built a topic clustering model using Latent Dirichlet Allocation (LDA) with a coherence score of 0.576, comparable to industry benchmarks, and leveraged ChatGPT for automatic topic labeling.

LEADERSHIP EXPERIENCE

Head of Operations – University of Toronto Indonesian Student Association

Toronto, ON | June 2024 - May 2025

- Lead a team of 6 to organize cultural and community events, and enhance engagement among members.
- Collaborate with cross-functional teams to execute events, successfully increasing member participation by 20%.
